DETAILED ACTION

The examiner withdraws the restriction requirement and offers the following restriction requirement:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 are drawn to a braze material, classified in class 148, subclass various.
- II. Claims 18-44 are drawn to a method of brazing, classified in class 228, subclass 245.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in semiconductor manufacturing.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1725

IF APPLICANT ELECTS GROUP II, THEN APPLICANT MUST ADDITIONALLY

ELECT ONE OF THE FOLLOWING:

This application contains claims directed to the following patentably distinct species of the claimed invention:

IIa. Claims 18-37 are drawn to a method of bonding at a temperature below the braze temperature.

IIb. Claims 38-44 are drawn to another brazing embodiment.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1725

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Oral Caglar on 11-9-05 a provisional election was made without traverse to prosecute the invention of Group IIa, claims 18-37. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-17 and 38-44 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Oral Caglar on 11-9-05.

The application has been amended as follows:

Cancel claims 1-17 and 38-44.

Claim Allowance

Claims 18-37 are allowed.

Art Unit: 1725

The following is an examiner's statement of reasons for allowance: The prior art of record does not suggest or teach a method of brazing titanium metal, particularly heating the braze material and base material to achieve thermal stability where the heating is up to a temperature that is not more than a braze temperature of the braze material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 571-272-1177. The examiner can normally be reached on M-Th 7AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
